PAULO IGOR RIVERO CONSULTANT DATA ENGINEER

GENERAL	
Name	Paulo Igor Rivero
Date of birth	30-Jun-1992
Place of residence	Fortaleza/CE, Brazil
Languages	Portuguese (native), English
Nationality	Brazilian
Experience since	2017

BACKGROUND		
Education		
2020 – 2021	Post-undergraduate in Specialization in Data Science	
	Organização Educacional Farias Brito	
2010 – 2018	Bachelor degree in Computer Science	
	UECE - Universidade Estadual do Ceará	
2014 – 2015	Abroad Student in Computer Science	
	Griffith College Dublin	

IZNIOWA	LEDOE and		NICE
KINUVV	ii Fijtaf an	d EXPERIE	NCE

Programing Languages		
Python	4 years	
Spark	3 years	
SQL	5 years	
PostgreSQL Oracle Database	3 years	
	4 years	
MongoDB	2 years	
R	1 year	

Tools, Frameworks and Libraries

Microsoft Azure Data Factory	2 years
Microsoft Azure Log Analytics	2 years
Azure Databricks	3 years
Microsoft Azure Storage Explorer	2 years
Pentaho Data Integration	3 years
Alteryx Design	2 years
Microsoft Power BI	3 years
Tableu	1 year
Microsoft Excel	5 years
Sklearn	1 year

Techniques and Methodologies

Data Analysis	4 years
Data Modeling	2 years
Data Mining	2 years
Machine Learning	1 year
Business Inteligence	5 years
Business Analysis	4 years

EMPLOYMENT OVERVIEW

Period	Position	Company
Jul/2021 - Present	Consultant - Data Engineer	ThoughtWorks
May/2020 - Jul/2021	Business Intelligence Analyst	CIALNE - Companhia de Alimentos do Nordeste
Apr/2019 – Apr/2020	Business Intelligence Analyst	SiMCo - Healthcare
Jun/2018 – Apr/2019	Assistant Business Analyst	CRC - Central de Recuperação de Créditos
Apr/2016 - May/2018	Technical Support Analyst	Stefanini Brasil

DETAILED EXPERIENCE		
July/2021 – Present	Consultant Data Engineer ThoughtWorks	
Company	Thoughtworks is a global technology consultancy that integrates strategy, design and engineering to drive digital innovation.	
Situation		
Task	Build and Refact pipelines	
	Monitoring pipelines executions	
	Develop Data Quality pipelines	
	Develop Monitoring Dashboards	
	As a consultant, guide the best way to proceed according to the client's business needs	
Activities	In this role I: Build pipelines to automate the ingestion of big data requirements to improve the response time	
	from machine learning models.	
	 Developed generic pipelines to make it easy to implement new pipelines in the future, just reusing pre-existent pipelines (pipelines templates). 	
	 Build monitoring pipelines to notify by e-mail as soon as it finishes, either with errors or not. 	
	 Build integrations using PowerBi and Log Analitycs to track the real-time processing status of pipelines from Azure Data Factory 	
	 Integration of Azure Log Analitycs with a third-party system to automate call-outs to the team 	
	members, reaching them by e-mail or any other contact(call, SMS).	
Results	Achievements in this role were:	
	 Created a dashboard with real-time processing status of pipelines, allowing a easy way to monitore pipeline runs. 	
	 Developed pipelines to automate data ingestion. Greatly reducing working time spent on this activity. 	
	 Created workflows to optimize delta tables, using vacuum to optimize storage as well. 	
	 Developed pipelines to verify data integrity, such as null values on key columns and duplicated data for instance. Notifying by e-mail any warning or alert related to this integrity. 	
Technologies	Azure Data Factory, Azure Log Analytics, Databricks, Microsoft Power Bl. PagerDuty, Jira, PySpark,

Apr/2019 – Apr/2020	Business Intelligence Analyst SiMCo - Healthcare	
Company	SiMCo is the largest healtech in the north and northeast of Brazil. That provides quality medical care for low-income people at affordable prices. With more than 1.5 million users, it has more than 20 clinics to date and innovates with dynamic pricing and disease prevention according to the history of each patient, using artificial intelligence.	
Situation	SimCo was at the moment with 12 active branches and in a fast-growing movement. The IT department was in need of a Business Intelligence Analyst to support all this growing, ensuring integrity and availability of all new data, so as to allow an optimizes study of all new branches.	
Task	As a main request, I was responsible for integrating information from new branches. Developed metrics, reports and dashboards. In close contact with the quality and product departments, I improved analysis and generated insights that optimized your daily tasks.	
Activities	In this role I: Develop and publish Dashboards . Manipulate Database to create triggers and procedures. Create and maintain datapipes.	
Results	Achievements in this role were: Migration of the company's BI environment, a hybrid solution using paid and open source tools. Implemented metrics and KPI visualisation for customer experience analysis, such NPS (Net Promoter Score) and CSAT (Customer Satisfaction Score). Participated in a joint effort to manage the process of variable remuneration for the service of each unit of the company. Created a workflow to automate the creation of bases for automatic dialer in the call centre sector.	
Technologies	Microsoft Power BI, PDI (Pentaho Data Integration), Oracle Developer, Microsoft Excel, Alteryx Design, Good Data – TOTVS Smart Analytics, TASY.	
Jun/2018 – Apr/2019	Assistant Business Analyst CRC - Central de Recuperação de Créditos	
Company	CRC - Central de Recuperação de Créditos was created 1997 with the goal of act as an interlocutor between partners and customers in the are of credit recovery. Has as mission recover credits and customers through efficient and ethical actions.	
Situation	CRC was been recognize for achieve credit recovery goals, increasing a lot the number of contractors for your services, such as famous Banks. The company was in need to contract a new employee to handle with this number of contracts.	
Task	Was responsible for improving data extraction to optimize dataset's generation. Generate strategies to reduce expenses. Manage massive actions, such as sending text messages and email, limiting resources spent by such actions.	
Activities	In this role I: SQL Database manipulation. Manipulate and Pre-Processing Data. Data analysis for strategic planning, improving the decision-making process, monitoring risks and reducing costs of massive actions.	
Results	Achievements in this role were: Developed strategies to reduce actions expenses with inefficient ROI (Return On Investment). Created flows to automate the creation of the dial list for the active credit recovery team, improving the performance of the operational team.	
Technologies	Alteryx Design, SQL Workbench, Tableau, Microsoft Excel.	
Apr/2016 - May/2018	Technical Support Analyst Stefanini Brasil	
Company	Stefanini is a Brazilian multinational that operates in the IT services sector. One of the most important global providers of technology-based business solutions.	
Situation	Having as a client one of the largest Brazilian national banks, Stefanini needed employees to to solv technical and banking systems problems from employees of that bank.	
Task	My role in this company was to receive requests from internal employees at that bank. Inconsistencies that I did not have the necessary tools to solve, were sent to the next level of service so that would be solve.	
Activities	In this role I: Provide customer service following the principles of the ITIL platform acting at Level 1. Support for banking systems using SQL and Active Directory tools. Technical support in hardware and software for internal employees.	
Results	Achievements in this role were: Interpersonal skills, such as make sure to be understood and well understand what is the real client request.	
Technologies	Microsoft Office Word, Microsoft Office Excel .
